The test results show that this device meets the FCC rules. Those limits are set to protect residential areas from the devices with harmful emission. This device will produce, use and radiate radio frequency energy. In addition, failure to follow the user's manual to install or use this device might produce harmful interference with radio communication. Notwithstanding the foregoing, it does not guarantee that this type of harmful interference does not occur in some special installations. The interference caused by this device to the reception of radio or television signals may be verified by turning it on and off. Any changes or modifications to this TFT LCD would void the user's authority to operate this device.

**Important Recycle Instruction:**

 Lamp(s) inside this product contains mercury. This product may contain other electronic waste that can be hazardous if not disposed of properly. Recycle or dispose in accordance with local, state, or federal Laws. For more information, contact the Electronic Industries Alliance at [WWW.EIAE.ORG](http://WWW.EIAE.ORG). For lamp specific disposal information check [WWW.LAMPRECYCLE.ORG](http://WWW.LAMPRECYCLE.ORG)

# Usage Notice

## **Warning!**

To prevent the risk of fire or shock hazards, do not expose this product to rain or moisture.

Do not open or disassemble the product as this may cause electrical shock.

## Precautions

Follow all warnings, precautions and maintenance as recommended in this user's manual to maximize the life of your unit.

### Do:

- Turn off the product before cleaning.
- Touch screen surface may be cleaned using a soft clean cloth moistened with mild window glass commercial cleaners or 50/50 mixture of water and isopropyl alcohol.
- Use a soft cloth moistened with mild detergent to clean the display housing.
- Disconnect the power plug from AC outlet if the product is not going to be used for an extended period of time.

### Don't:

- Do not touch the LCD Display screen surface with sharp or hard objects.
- Do not use abrasive cleaners, waxes or solvents for your cleaning.
- Do not operate the product under the following conditions:
  - Extremely hot, cold or humid environment.
  - Areas susceptible to excessive dust and dirt.
  - Near any appliance generating a strong magnetic field.
  - In direct sunlight.

## Introduction

### About DTW19T100-A1-PCT

DT = Desk Top

W = Widescreen ratio of 16:9

18.5 = Diagonal viewing area in inches

PCT = Projected Capacitive Touch

The monitor has a flat panel screen with an active matrix, thin-film transistor (TFT) liquid crystal display (LCD).

#### Features include:

- Direct Analog signal input
- Active matrix TFT LCD technology
- 1366 x 768 SXGA resolution
- 18.5" viewable display area
- 31.47 ~ 60.02 KHz horizontal scan
- 56 ~ 75 Hz high refresh rate
- 0.3mm x 0.3mm pixel pitch
- Auto adjustment function
- Multilingual OSD user control
- Kensington security slot
- 100 mm VESA mount
- Removable base for flexible mounting solutions.
- Projected Capacitive touch screen with USB controller.

### **Touch Screen for DTW19T100-A1-PCT**

- Projected capacitive touch screen for finger input only
- Surface: Glare treatment
- Interface: USB controller
- Transmittance: 90±5%
- HID: Windows® 7
- Driver: VISTA, XP, 2000, CE, XP Embedded, Linux, Apple® Mac OS

# Installation

## Product Overview

Front View

Bottom View

## Kensington Security Slot

The monitor can be secured to your desk or any other fixed object with Kensington lock security products. The Kensington lock is not included.

## VESA Mount for Your Monitor

This monitor conforms to the VESA Flat Panel Mounting Physical Mounting Interface standard which defines a physical mounting interface for flat panel monitors, and corresponding with the standards of flat panel monitor mounting devices, such as wall and table arms. The VESA mounting interface is located on the back of your monitor.

To mount the monitor on an UL-listed certified swing arm or other mounting fixture, follow the instructions included with the mounting fixture to be used.

### **Warning!**

***Please select the proper screws!***

***The distance between the back cover surface and the bottom of the screw hole is 11 mm. Please use four M4 screws diameter with proper length to mount your monitor.***

***Please note: the mounting stand must be able to support at least 11 lbs ( 5Kg).***

## Connecting the Display

To setup this display, please refer to the following figure and procedures.

1. Be sure all equipment is turned off.
2. Connect the DC plug to the power connector on the monitor and the other end into an electrical outlet.
3. Connect the D-SUB cable from the display's D-SUB input connector to the D-SUB connector of your host computer and tighten the screws.
4. Connect the USB cable from the USB port of your display to the USB port of your computer.
5. Configure the touch screen. Refer to the "Touch Screen Driver Installation" section on page 20.
6. Once the touch screen is configured, the monitor is ready for use.

### **⚠ Notice!**

To ensure the LCD display works well with your computer, please configure the display mode of your graphics card to make it less than or equal to 1366 x 768 resolution and make sure the timing of the display mode is compatible with the LCD display.

We have listed the compatible "Video Modes" of your LCD display in the appendix (on page 15) for your reference.

### Remove the Deskstand

	<p>Remove 4 screws and then remove hinge.</p>

Volume (Audio model only)	Audio volume adjustment.
Mute (Audio model only)	Audio On/Off control.

## Appendix

### Troubleshooting

If you are experiencing trouble with the LCD display, refer to the following. If the problem persists, please contact your local dealer or our service center.

#### **Problem: No image appears on screen**

- Check that all the I/O and power connectors are correctly and well-connected as described in the “Installation” section.
- Make sure the pins of the connectors are not crooked or broken.

#### **Problem: Partial Image or incorrectly displayed image**

- Check to see if the resolution of your computer is higher than that of the LCD display.
- Reconfigure the resolution of your computer to make it less than or equal to 1366 x 768.

#### **Problem: Image has vertical flickering line bars**

- Use “FINE” to make an adjustment.
- Check and reconfigure the display mode of the vertical refresh rate of your graphics card to make it compatible with the LCD display.

#### **Problem: Image is unstable and flickering**

- Use “HORIZONTAL SIZE” to make an adjustment.

#### **Problem: Image is scrolling**

- Check and make sure the VGA signal cable (or adapter) is securely connected.
- Check and reconfigure the display mode of the vertical refresh rate of your graphics card to make it compatible with the LCD display.

#### **Problem: Vague image (characters and graphics)**

- Use “FINE” to make an adjustment. If this problem persists, use “HORIZONTAL” to make an adjustment.

## **Warning Signal**

If you see warning messages on your LCD screen, this means that the LCD display cannot receive a clean signal from the computer graphics card.

Below are the three kinds of Warning Signal. Please check the cable connections or contact your local dealer or our service center for more information.

## **No Signal**

This message means that the LCD display has been powered on but it cannot receive any signal from the computer graphics card. Check all the power switches, power cables, and VGA/DVI signal cable.

## **Going to Sleep**

The LCD display is under the power saving mode. In addition, the LCD display will enter power saving mode when experiencing a sudden signal disconnecting problem.

The monitor can be activated by pressing any keyboard, triggering the mouse or touching the screen.

## **Out of Range**

This message means that the signal of the computer graphic card is not compatible with the LCD display. When the signal is not included in the "Video Modes" list we have listed in the Appendices of this manual, the LCD monitor will display this message.

## Touch Screen Driver Installation

The monitor is available with USB connection. The Linux kernel 2.6.x (32 bit & 64 bit) touch driver is located on the enclosed CD-ROM. HID for Windows® 7, VISTA , XP, 2000, ME, 98.

### **Please Note:**

The system requires 15 seconds for Windows® 7 to install/uninstall the touch drivers while turning power on/off or plugging/unplugging USB cable.

### **Driver Install Instructions:**

If you are using a PC running driver Linux kernel 2.6.x (32 bit & 64 bit), follow the instructions below:

1. Power on the PC.
2. Be sure the USB cable is connected from the PC to the LCD display.
3. Open the CD-ROM.
4. Follow the step-by-step instructions as shown on the pop-up windows.

### **If you are using a PC running Windows® XP Embedded, follow the instructions below:**

#### **Express:**

1. Power on the computer.
2. Make sure that the USB cable is connected to the computer.
3. Be sure that your EWF is disabled. If your EWF is enabled, please disable the EWF by using the EWF Manager command.
4. Once the EWF is disabled click on the XP driver on the CD-ROM and follow the step-by-step instructions as shown on the pop-up windows.

#### **Custom:**

1. Power on the computer.
2. Make sure that the USB cable is connected to the computer.
3. Follow the step-by-step instructions found in the folder file on the CD-ROM.

### **If you are using a PC running Windows® CE, follow the instructions below:**

1. Power on the computer.
2. Make sure that the USB cable is connected to the computer.
3. Using Platform Builder, build an image file by following the step-by-step instructions found in the folder file on the CD-ROM.

**If you are using a PC running Linux or Apple® Mac OS, follow the instructions below:**

1. Power on the computer.
2. Make sure that the USB cable is connected to the computer.
3. Follow the step-by-step instructions found in the folder file on the CD-ROM.
