

USB to RJ45 Ethernet adapter

for Digital Signboards (Part number SDS-USB-RJ45)

Highlights

- ◆ **Plug and play**
- ◆ **Certified for Digital Signboards**

The USB to RJ45 Ethernet adapter adds wired networking capability to the wireless-enabled AIS Smart Digital Signboard line.

Simply connect to the Digital Signboard's USB port and reboot player to disable its internal radio and initialize the LAN connection.

For installations where cable connections are preferred, the Ethernet adapter provides added benefits of increased reliability and security over default wireless connections.
